

Funline TS Series

This is a start as you mean to go on inflatable....

This dinghy is perfect for getting out to moorings or rowing on a tranquil lake or under power for exploration of sheltered coves.

Slatted deck (TS) model

The slatted Funline is ideal for use as a tender, or for fishing and camping. Designed specifically as a no- maintenance, no-assembly inflatable, the Funline TS range comes with a Slatted Floor / PVC covered marine ply floor and a fiberglass transom.

The large diameter tube (380mm) means more buoyancy and stability for a drier and safer ride. Lightweight and extremely portable, the Funline range was built to be easily inflated - whether on the foredeck, pier, beach, or even in the water from the swim step of your powerboat.

Technical Specifications TS Series (Foldable Boats with slatted polyethylene floor and marine plywood transom)
